

SCHULZ Systemtechnik GmbH belongs to the leading providers of capital goods from different industries. The company, founded in 1954 in Visbek (Lower Saxony) as a classic handicraft business, soon became an internationally operating business group.

SCHULZ has also been involved in the agricultural systems production field from the start, not least because the roots of the company lie in the midst of the European Centre for the processing industry and animal husbandry. SCHULZ Systemtechnik combines all three disciplines of automation technology – from mechanics to electrical engineering to software – and as such has the complete value chain from a single source. Specially tailored solutions are created for respective customers, from companies within the SME sector to large-scale industry. Extensive synergies within the group of companies as well as extensive knowledge and expertise in the various sectors and their techniques are essential advantages.

In the field of agricultural technology, we offer the following solutions:

- > Housing systems for modern animal husbandry
- > Safety and fire protection systems
- > Feeding and watering technology
- > Communication technology
- > Air conditioning systems
- > Switchgear construction
- > Exhaust air cleaning
- > Biogas
- > Lighting
- > Photovoltaics
- > Weighing equipment

**Integrated solutions
for the poultry industry**

SCHULZ Systemtechnik offers comprehensive solutions in automation technology. In the agricultural sector, we focus on the production of stable systems and offer complete solutions from design through to implementation and service. Thanks to the extensive expertise we also have in upstream and downstream sectors, you can benefit from integrated solutions for the poultry industry and increase your added value.

Breeding and breeder management

SCHULZ Systemtechnik has the right concept for economical breeder management. Animal-friendly systems provide the optimum environment for egg-laying hens. They are based on automatic rolling nests with a movable floor which allows only few possibilities of breeding. Nest pads are cleaned daily - which guarantees very high-quality eggs. To transport eggs, a perforated egg belt is located at the back of the nest.

We offer:

- > Integrated nests with movable floor
- > Different nest systems with side belt or middle belt
- > Water supply through drinking nipples, optionally with water drip trays
- > Feeding through reliable food chain or feeding tray
- > Separate chicken feeding systems
- > Plastic racks in front of nests
- > Egg conveyor belts
- > Egg packaging

Hatchery

As an automation technology company, SCHULZ Systemtechnik boasts a high level of know-how in the equipment for hatchery establishments. From the conceptual design and engineering to technical equipment.

We offer:

- > Low and medium voltage systems
- > Installation of breeding technology, from pre-breeding to hatching
- > Ventilation and heating
- > Machine technology for eggs treatment
- > Chicks logistics
- > Data network technology
- > Connection to ERP systems

Meat chicken farm

For a successful chicken fattening period, SCHULZ Systemtechnik provides optimal housing equipment. Innovative control systems ensure the best possible stable conditions for healthy animal growth.

We offer:

- > Ventilation systems with and without exhaust air scrubbers
- > Lighting technology
- > Feeding systems
- > Drinking systems
- > Heating systems
- > Heat exchangers
- > Electrical installations
- > Alarm systems

Compound feed manufacturing, Butchery

SCHULZ Systemtechnik has been providing automation technology for the animal nutrition and food industry for many years. The service portfolio offered includes complete solutions, from design through to implementation and service.

We offer:

- > Consulting, planning, design, documentation
- > Programming, visualisation
- > Supply of switchboards
- > Installation
- > Connection to ERP systems
- > Commissioning, training
- > Remote diagnostics
- > 24-hour service
