All in all.
At an international level.
Leading the way.

For mutual success.

For whom what where?

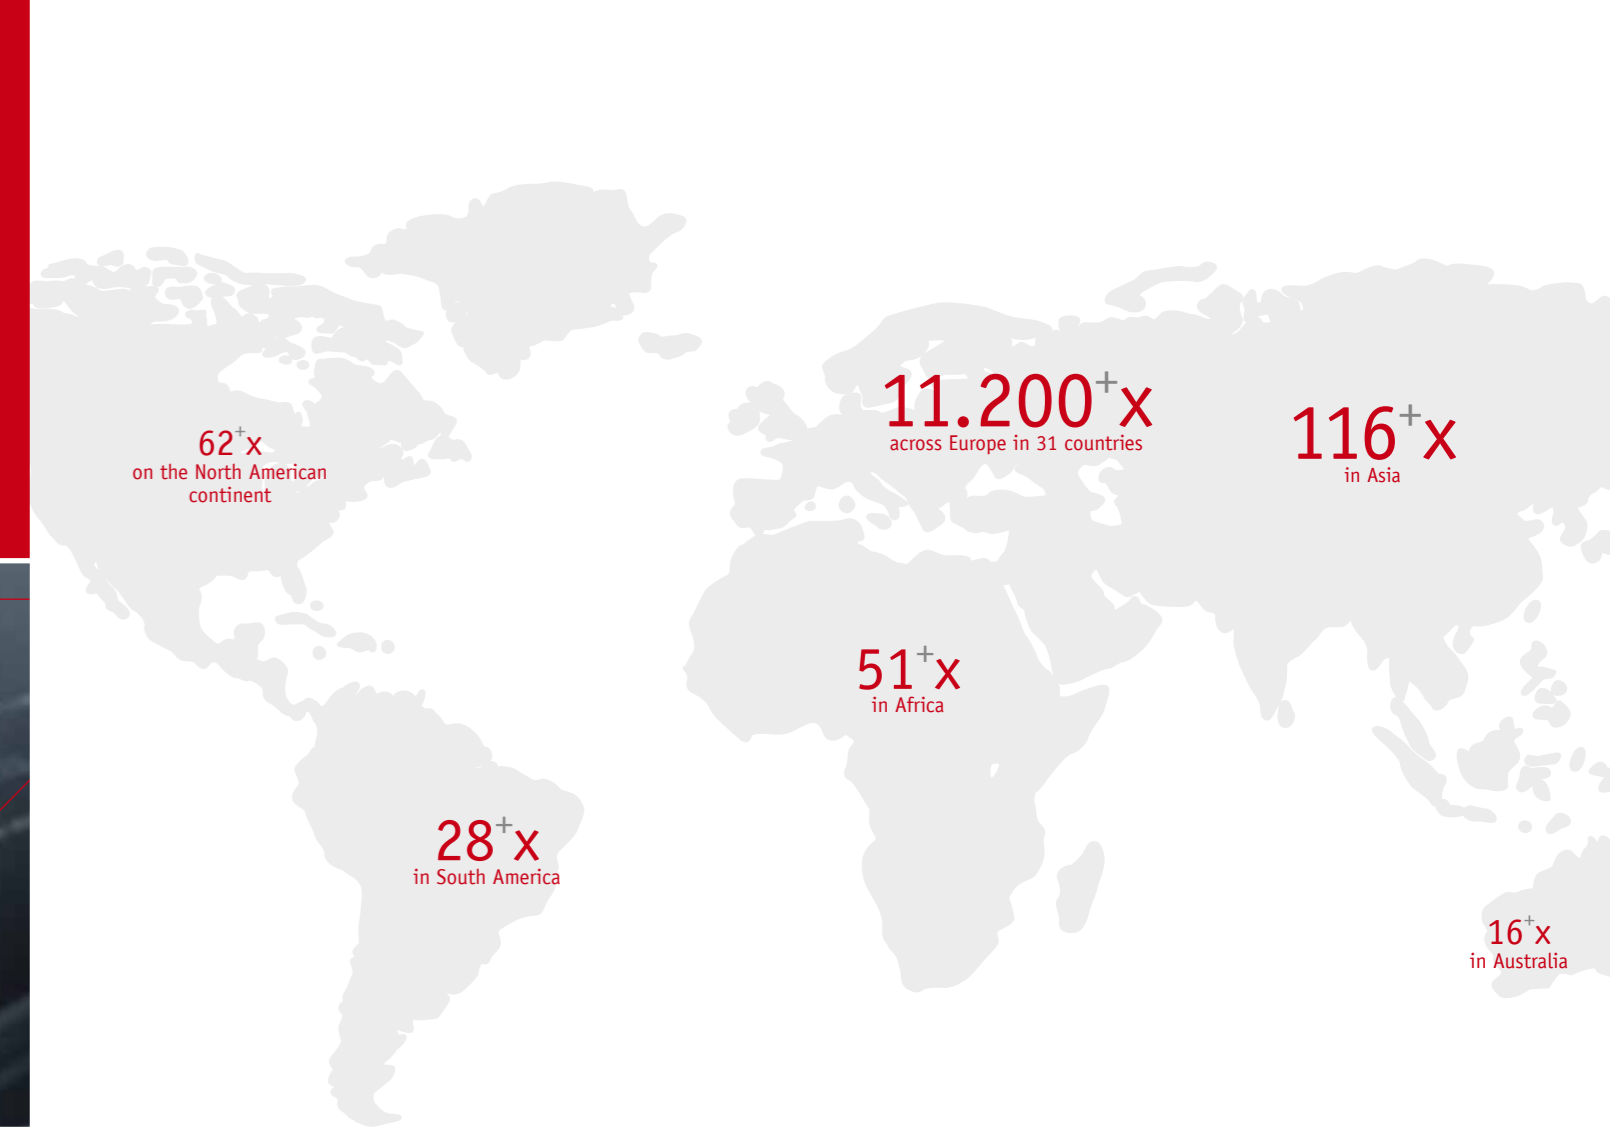

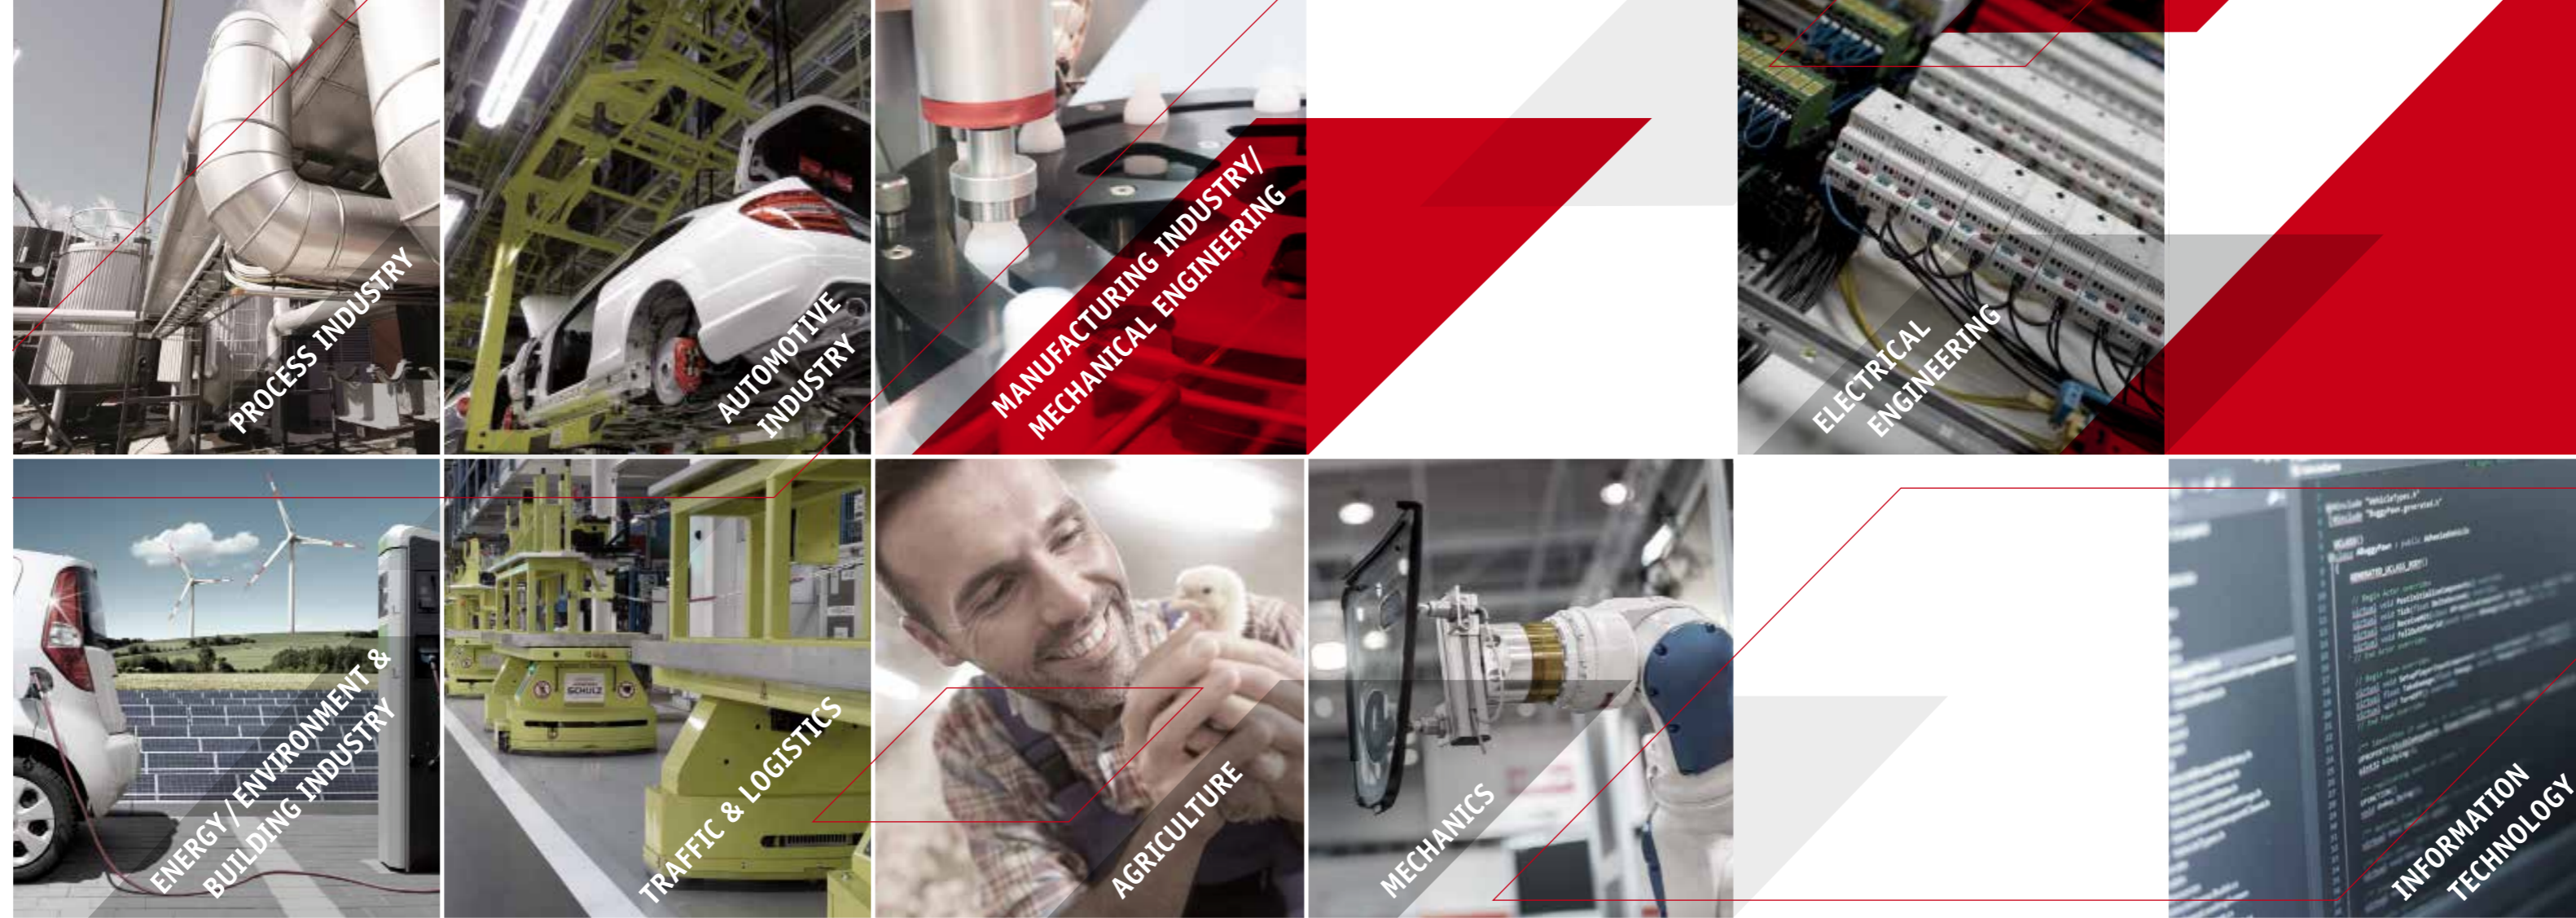

SCHULZ Systemtechnik GmbH,

Leading company in the development of automation solutions for different industrial branches, was founded in 1954 in Visbek, Lower Saxony. What had begun as a conventional small business for electrical installations, has now developed into an international group of companies with nearly 1.000 collaborators.

Our tailored solutions are developed to meet the individual customer's needs and they are ideally suited for medium-sized businesses as well as large corporations. SCHULZ Systemtechnik combines all three branches of automation technology – from mechanics and electrical engineering up to information technology – thus covering the whole value-added chain.

As technology leaders, we are aware of the responsibility to our customers and collaborators. Therefore Hightech Strategy Industry 4.0 means ambition and vision to us. Thanks to our know-how and strategic approach to new challenges, we shape our common future.

For whom?

Process or automotive industry, manufacturing industry and mechanical engineering, energy/environment and building industry, traffic and logistics or agriculture

– We know your branch and understand your technology.

Thanks to our comprehensive range of industrial units and diversified customer base, we can put our extensive expertise and know-how at your disposal. Once they combine with the synergic effects within our group of companies, they develop fundamental benefits for our customers.

what?

In future automation will no longer be the intersection of three different sectors, namely, mechanics, electrical engineering and information technology, but it will include all of them.

You may highly benefit from our comprehensive automation solutions. With perfectly coordinated plans, which combine electrical engineering with special machine construction, software development and robotics – we lay the foundations today for tomorrow's challenges

where?

No task is too big for us. Together with our customers we tackle any challenge and we are exactly, where they need us to be. To date our teams have successfully completed more than 11.500 projects worldwide spread over 5 continents and 56 countries.

We build solutions.
All in all. At an international level. Leading the way.
We strive for the best.
Best collaborators.
Best processes.
Best products.
For mutual success.
